- Burmese (Native)
- English (B1 - Intermediate)

PROFILE

A highly motivated and quick learner with a strong foundation in computing, I am pursuing a Bachelor of Science in Computer Science at the University of the People. I worked as Mid-Level Developer in Previous Company. My expertise includes developing web applications using Python, HTML, CSS, and JavaScript. I have hands-on experience in deploying and maintaining APIs, managing server-side logic, and enhancing project performance through collaborative efforts. I am passionate about coding reusable and efficient solutions. Additionally, I have a proven track record in managing and applying team needs, ensuring seamless project execution from development to deployment. You can explore my provided linkedin profile for more information.
